

Name: Brasilia Perez
Major: Environmental Systems EBE
Graduation Year: Spring 2021
Job/s: Resident Advisor and Peer Advisor

I am a 4th year Sixth College student (graduating in 5) and an Environmental Systems EBE major. I am currently a Resident Advisor (RA), as well as a Peer Advisor and a Front Desk Intern for both the Sixth and Revelle FYE courses as a discussion leader, and OASIS as a TRIO SSSP peer mentor. I love love love traveling, the beach, warm weather, and deep personal and professional connections. I have a passion for student affairs and social justice, particularly in residence life, and I hope to go to graduate school to pursue a masters degree in Student Affairs after I leave UC San Diego. In the future, I hope to work at universities to create impactful changes to the student experience as well as to help support and mentor the next generation of student leaders.

I have known Brasilia since her freshman year when she enrolled in my CAT 3 course (In fact, we started at UC San Diego the same year!). From the very beginning, Brasilia stood out as a bright, driven, and delightful young woman. She represents the best of what Sixth is about—she blends art, STEM, social justice, and community building in everything she does. She plans to pursue a career in residence life and I am so excited to see what she will do. I feel very lucky to have had Brasilia as a student twice, to have had the chance to get to know her and watch her grow at UC San Diego, and now to count her as a friend (and eventually, a colleague!).
